

Borescope Accessories and Options

The drawing below illustrates the accessories available to view your inspections with video in the lab or the field on LCD Monitors and capture the images as either color video or photo stills. Light source options for both AC and DC operation, and Borescope options for seeing a direct side view without articulating (side view prism tip), non-conductive coating for special applications and light guide adapters for other manufacturers light sources. Please contact us to discuss your application and how we provide a solution.
